WEB DEVELOPER

Email: hello@emilyconnors.com

Website: www.emilyconnors.com

SUMMARY: Lead Website Developer with 8 years hands-on experience building responsive and dynamic websites. Strong leadership skills and solid understanding of front-end development.

EXPERIENCE

LEAD CMS DEVELOPER

Simpleview, Tucson, AZ, January 2016 - January 2022

- Hired as a Jr. Developer and rapidly advanced to Lead CMS Developer, June 2018, based on ability to meet all technical and team leadership demands.
- Proven ability to develop small to large scale website tools and applications.
 - Completed over 200 website builds, with budgets from 80 to 25,000 man hours using HTML, CSS, Javascript, APIs, Vue.js, MongoDB and more.
 - Assessed UX/UI designs to ensure technical feasibility on Simpleview CMS and products, adhering to web best practices, accessibility, and security, providing alternative solutions when needed.
 - Developed custom-built solutions to meet client needs which expanded the capabilities of our CMS platform.
 - Within my first year at Simpleview I introduced new procedures for content coordinator role, which improved consistency and accountability. These procedures were adopted company-wide and are in use today
- Proven ability to lead a development team
 - As Lead CMS Developer of a 6-man team, acted as point of contact for all product related issues for over 100 website build projects with licensing contracts up to \$70,000 annually.
 - Coordinated with multiple departments including project managers, creative design, product development, digital marketing and content teams in day to day support of Simpleview client websites, powered by SaaS CMS platform, from design concept through deployment.
 - Demonstrated competencies in training and mentoring. Successfully onboarded new employees to assume varied roles within the company. Responsible for adding and updating technical documentation for department knowledge-base.

WEB DEVELOPER

The Fox Theory Jun 2014 - Jan 2016

- Created the look, layout and features of client websites using WordPress platform with PHP.
- Built The Fox Theory website using HTML, CSS and JavaScript.
- Assisted in company launch by setting up domain and hosting services, email configuration and an online project management system.

PROGRAMMING LANGUAGES, DEVELOPER TOOLS, AND OTHER SKILLS

- HTML5, CSS3, Javascript, MongoDB, React.js, Vue.js, Node, Git/Github, Backbone, Bootstrap/Foundation, Wordpress, Photoshop, Illustrator, Mustache/Handlebars, Restful APIs, Amazon AWS, Ruby on Rails
